Assignment 3(Java Script)

(Due Date:- 04/13/2019 11:59 PM)

(This assignment involves more programming so don't procrastinate and start early)

Step 1:- Copy all the files from Assignment 2.

Step2:- Now add a welcome page which takes you to the quiz page.

Step3:- Now add a timer once the quiz is loaded timer should start, allow users to complete the quiz in 10minutes. The timer should be displayed on top of the webpage and it should keep updating every second.

Step 4:- As user answers question the progress bar added on top should move for example initially it will 0, as the user answers 5 questions progress should reach half.

Step 5:- Once the timer reaches 0:00 modal window should appear saying, Thank you for participating and show how many questions user answered, how many were correct and how many were incorrect.

Step 6:- Complete Reflection via Slack (#spring2019assignment2)

Step 4 and 5 will be discussed in class with a few examples.
